Parking Surplus for Area around a Parking Garage on the East Side of Georgia Avenue between Geranium and Hemlock Streets:

West side of Georgia Aven	ue Subtotal:	156	160	27	8
Ī	Total	318	200	50	30

52

(290+50+30-318)

Side street parking available for commercial usage was estimated to be fifteen percent of the available spaces on the following streets:
West of Georgia Avenue between Georgia Avenue and 12th Street: Fern, Geranium, Shepherd Streets; Alaska Avenue; Kalmia Road
East of Georgia Avenue between Georgia Avenue and 8th Street: Fern Place, Geranium, Hemlock, Juniper Streets; Blair Road
South of Eastern Avenue between Eastern Avenue and Kalmia Road: 12th, 13th, 14th Streets

¹ Washington DC zoning requlations calculate parking for churches and funeral homes based on their number of seats. Where the number of seats was not available, the required parking was calculated based on square footage.

² Since repair shop and car lot parking is self contained and may not be used by adjacent businesses, ths surplus value is removed from the calculation of parking deficits for repair garages and car lots.

Table F2 Existing Parking Deficit Calculations Based on a Garage Located on the East Side of Georgia Avenue Between Hemlock and Juniper Streets

Parking Deficit for Area around a Parking Garage on the East Side of Georgia Avenue between Hemlock and Juniper Streets: 67 (568-419-51-31)

Available

Side street parking available for commercial usage was estimated to be fifteen percent of the available spaces on the following streets: West of Georgia Avenue between Georgia Avenue and 12th Street: Fern, Geranium, Shepherd Streets; Alaska Avenue; Kalmia Road East of Georgia Avenue between Georgia Avenue and 8th Street: Fern Place, Geranium, Hemlock, Juniper Streets; Blair Road South of Eastern Avenue between Eastern Avenue and Kalmia Road: 12th, 13th, 14th Streets

¹ Washington DC zoning regulations calculate parking for churches and funeral homes based on their number of seats. Where the number of seats was not available, the required parking was calculated based on square footage.

² Since repair shop and car lot parking is self contained and may not be used by adjacent businesses, ths surplus value is removed from the calculation of parking deficits for repair garages and car lots.

					Parking De	ficit for Entir	e Study Area	: 20	(893-694-120-	·59)	_

Side street parking available for commercial usage was estimated to be fifteen percent of the available spaces on the following streets: West of Georgia Avenue between Georgia Avenue and 12th Street: Fern, Geranium, Shepherd Streets; Alaska Avenue; Kalmia Road East of Georgia Avenue between Georgia Avenue and 8th Street: Fern Place, Geranium, Hemlock, Juniper Streets; Blair Road South of Eastern Avenue between Eastern Avenue and Kalmia Road: 12th, 13th, 14th Streets

Upper Georiga Avenue Parking Study

¹ Washington DC zoning requlations calculate parking for churches and funeral homes based on their number of seats. Where the number of seats was not available, the required parking was calculated based on square footage.

² Since repair shop and car lot parking is self contained and may not be used by adjacent businesses, ths surplus value is removed from the calculation of parking deficits for repair garages and car lots.
